

INTRODUCTION

EnSight allows you to pick where you would like the center of transformation to be for the model.

BASIC OPERATION

1. In Part Mode, select the Pick Object icon.

2. Toggle on Pick Center of Transformation.....

3. Position the mouse cursor on your model at the desired location for the center of transformation.

4. Press the "p-key".

Your model will now rotate about the position on the model that you just picked.
